**A relationship you can build a career on**

TEKsystems® Technical Professional Services<sup>SM</sup> offers the market's best opportunities in applications, IT infrastructure, and communications, as well as the benefits, tools, and support you need to build and maintain a career. We call specialized consultants and contract employees like you *Technical Professionals* because it emphasizes your expertise, not your employment status.

As one of the largest IT and communications staffing firms in the U.S., we have over 20,000 employees on-site with customers every day. Our more than 90 locations throughout the U.S., Canada, and Europe serve a wide variety of industries, providing Technical Professionals to clients ranging from Fortune 500 companies to small entrepreneurial firms.

We've become a market leader because of our promise to provide extraordinary customer service, and one of the ways we uphold that promise is by finding exceptional Technical Professionals for our clients.

We know that the success of our business relies on the abilities and integrity of our people. That's why we're committed to finding the market's best professionals and helping them grow. We work hard to build strong, long-term relationships with our people and support them through professional and technical training, comprehensive benefits packages, and excellent compensation. We also work hard to place our Technical Professionals in positions where both the Technical Professional and the client will benefit. That's why we have one of the industry's highest rehire ratios.

TEKsystems isn't just an employer; we're a partner—the kind of partner you can rely on to help you build a successful career in technology.

**More opportunities, better opportunities**

Thanks to our large network and strong relationships with customers in numerous industries, we're able to provide our Technical Professionals with a wider variety of career choice opportunities. No matter where you live, we have offices to find the right work situation for you. And if you decide to move, our size gives you the flexibility to continue working with us almost anywhere you go.

We identify more job opportunities than other firms because we have one of the highest salesperson/recruiter ratios in the industry. In short, we have more people dedicated to finding you your next job. And the one after that. In addition, our recruiters and salespeople have the latest tools available to them to find you work. Our thingamajob.com<sup>®</sup> network, for example, is one of the latest Internet job boards for Technical Professionals. It's one of many ways we're able to find you opportunities quickly and effectively.

But we don't just provide lots of opportunities—we provide the ones that best match your profile. We're able to identify quality positions, thanks to our more than 20 years' experience matching Technical Professionals with the right clients and positions.

We've developed the Successful Placement Process<sup>SM</sup> to assure that across our network, recruiters and salespeople successfully pair skills and character for the most productive and satisfying matches. This process not only makes for the best initial match, but it keeps us informed of how you feel about your assignment and your performance, so that both you and the customer are always satisfied.

**Technical and professional training**

To keep you at your best and allow you to continually improve your skills, all of our Technical Professionals have the option to receive ongoing training in new and emerging technologies. Whether you want to simply build on existing knowledge, wish to explore a new area, or are seeking certification, our computer-based training and multiple training labs throughout the U.S. will keep your skills current.

We also offer employees professional and management training. Whatever your aspirations, our training can help you reach your goals.

**Virtual Support Community (VSC)**

TEKsystems' Virtual Support Community (VSC) is a web site that offers every TEKsystems Technical Professional a variety of technical resources and links to maximize their professional development. The VSC (<http://vsc.teksystems.com>) provides access to online training, as well as company and technology industry news.

eLearning: Each employee has access to a total eLearning package made possible through our partnership with Thomson NETg<sup>TM</sup>, a global leader in providing integrated information solutions to business and professional customers:

- Ability to access the training from any internet connection
- Can now choose from 1,000 technical courses
- More classes offering continuing education credits
- Mentor Now – which gives access to a subject expert within 45 seconds guaranteed
- Addition of project management classes

Tech-industry news: To keep you informed of the latest industry trends, the VSC consolidates all technology news in one place, for fast, easy access.

When you commit to  
TEKsystems, we commit to you.
